What is this product?

Type

The product is in the form of a certificate issued under English law. It is an interest bearing security. The payment obligations of the product manufacturer are not guaranteed by any entity.

Term

The product has a fixed term and will be due on March 24, 2025.

Objectives

The product pays a fixed rate of interest. What you will receive at the end of the term of the product is not certain and will depend on the performance of the ordinary shares of Banco BPM S.p.A. (ISIN: IT0005218380), listed on Borsa Italiana (the **underlying asset**). However, you will take the risk that some or all of the value of your investment may be lost at the end of the term of the product. The product has a fixed term, ending on March 24, 2025. Each certificate has a face value of EUR 100. The issue price is EUR 100. The product will be listed on Borsa Italiana (SeDeX). The issue date is March 23, 2022.

Interest: On each interest payment date, you will receive interest of EUR 1.00 for each certificate that you hold. Interest payment dates are each business day rolling quarterly from June 23, 2022 (inclusive) to March 23, 2025 (inclusive).

Repayment at maturity:

On March 24, 2025, for each certificate that you hold:

1. If the closing price of the underlying asset on March 17, 2025 is at least equal to the barrier price, you will receive EUR 100.00; or
2. *Otherwise*, you will receive EUR 100.00 multiplied by (i) the closing price of the underlying asset on March 17, 2025 divided by (ii) the strike price of the underlying asset.

The initial reference price is EUR 2.722, which is the closing price of the underlying asset on March 23, 2022. The strike price is EUR 2.722, which is 100.00% of the initial reference price. The barrier price is EUR 0.9527, which is 35.00% of the initial reference price.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the underlying asset, the product and the product manufacturer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Intended retail investor

The product is intended to be offered to retail investors who:

1. have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, with experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. seek income, expect the movement in the underlying asset to perform in a way that generates a favourable return and have an investment horizon of the recommended holding period specified below;
3. accept the risk that the issuer could fail to pay or perform its obligations under the product but otherwise are able to bear a total loss of their investment;

What are the risks and what could I get in return?

Risk indicator

DocID: c2262709-67d9-423c-990c-a72b5c6485e1

Lower risk **Higher risk**

The risk indicator assumes you keep the product until March 24, 2025.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This takes into account two elements: (1) the market risk - that the potential losses for future performance are rated at a very low level; and (2) the credit risk - that poor market conditions are deemed very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed or interest you may be paid under the investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
